About Me

I am a passionate software engineer specialized in building web and mobile applications. I pride myself in working on all parts of an application stack be it on the server, browser or a mobile phone.

Personal Projects

- <u>Huegasm</u>: A Chrome, web and mobile app for controlling Philips Hue lights and synchronizing them with beat of your music.
- <u>Tomati</u>: A mobile app for searching and ranking Canadian restaurants based on health inspection reports.
- <u>Game modding</u>: Created plugins for a popular game called Counter Strike (1.6)
