About Me

I am an experienced and passionate full stack software engineer specializing in building modern web-based applications. I have experience building single page web apps, hybrid mobile apps and browser extensions.

Work Experience

Fullstack Web Developer, Google: Nest
Remote & Palo Alto, US — Oct. 2016 - Present

Languages/Tools: Ember.js, Golang, MySQL, Nginx, Redis, Docker, TeamCity, Git

Senior Software Engineer, Absolute Software Co.
Vancouver, BC — Jan. 2014 - Oct.2016

Languages/Tools: Ember.js, Java EE (Jersey + Spring), SQLite, MongoDB, Bash scripting, Node scripting, TeamCity, Git, TFS, (a little) C++

Intermediate Software Engineer, OpenBet Technologies Ltd.
Burnaby, BC — Aug. 2012 - Jan. 2014

Languages/Tools: TCL, JavaScript (Backbone.js, RequireJS), Informix, Bash scripting

Intern Software Engineer, SAP
Vancouver, BC — Aug. 2009 - Aug. 2010

Languages/Tools: Java, Perforce, Visual Studio 2005, Eclipse

Other Experience & Projects

- A Chrome, web and Android app for controlling your Philips Hue lights and synchronizing them with beat of music: http://www.huegasm.com
- An upcoming Android app for searching the restaurant health inspection reports: https://www.tomati.io
- Co-taught introductory web development to high school students through BrainStation Vancouver
- Used to develop plugins for a popular game called Counter Strike 1.6. My old, publicly available plugins are still up at: http://www.amxmodx.org/compiler.php?mod=1&cat=0&plugin=&author=hoboman&go=search

Education

Simon Fraser University
Bachelor of Science in Computing Science — 2009-2012
